

The Zion Healing Energy Foot Detox

An ionic foot detox unit is a modern energy therapy device which balances the body's natural energy system. By introducing a high level of negative ions into the water of a foot bath, the feet, utilizing principles of reflexology and the science of ionization and osmosis, create a positive cellular environment and enable the body's natural detoxification processes to function at their peak.

Our bodies naturally detoxify through the liver and kidneys, but our bodies were never designed to manage the toxic load in today's environment. The Zion Foot Detox unit utilizes the power of electricity to give the detoxification process a boost not only by extracting toxins during the 30 minute session, but also by stimulating the body's systems, an effect that can last for days after the treatment. It is important to maintain a detoxification regimen.

Zion Foot Therapy Detox

How it works?

The foot detox focuses on removing toxic materials from the body channeling it through the pores in the feet. Pores located in the feet are the largest pores in the body. When you place your feet into the warm water, the ionator module begins to send an energy charge through the water and into your feet. The cells in your body are energized by the ions and will begin to remove the toxins through your feet, which includes cellular debris, yeast, heavy metals and other wastes that have accumulated over your lifetime. Foot detox therapy also assists in re-balancing your body's pH level. For best results 6-10 sessions are recommended.

The Zion Healing Energy team has performed thousands of treatments across the country and has been receiving overwhelming feed-back from clients who are truly astonished by their results.

Some of the Health Benefits:

- Purging of heavy metals
- Reduced inflammation
- Improved memory
- Improved sleep
- Reduced menopause symptoms
- Stress reduction
- Increases energy
- A more balanced pH level
- Improved sexual health
- Purging of yeast

- Significant pain relief: including relief of headaches, gout, and arthritic pain
- Greater bladder control
- Reduction of acne, wrinkles and other skin problems
- Weight loss
- Allergies

Who Should Not Use The Ion Foot Detox ?

- Pregnant women and breast-feeding mothers
- People with Pacemakers or any other battery-operated or electrical implant
- People with implanted organs or steel plates or joints
- People with epilepsy
- People with open wounds on their feet
- People currently undergoing radiation therapy or chemotherapy

What Happens During a Detox Treatment?

- You immerse your feet in warm water.
- The foot spa is set to the appropriate time settings and ionization levels.
- Then you sit back and relax for 30 minutes while the foot spa starts to draw toxins out as well as stimulate the entire body -- including the kidneys and liver -- to improve their ability to detoxify your body.
- Your body will continue to detox for the next 24-48 hours.

What does the colors in the water mean?

Users of detox foot bath will typically notice the color changing in the water. This is because the toxins that have accumulated in our body react with the ionized water. In this case, you literally get to see the cleansing process. The color in the water indicates that there is a reaction occurring in the water. Are you curious to know what color your water will be? Make an appointment now.

What Can I Expect After A Detox Session?

After just one session with The Zion Foot Detox, you will experience:

- A deep, sound sleep that evening
- Renewed energy the following day

After a series of treatments with The Zion Foot Detox, you will feel:

- Improved Circulation
- Decreased Stiffness in Joints
- Firmer, Tighter Skin
- Improved Digestion
- Decreased Recovery Time from Injury or Surgery
- Enhanced Liver and Kidney Functions
- Increased Metabolism
- Mental Clarity and Alertness
- Better Overall Sense of Well-being

***It is recommended to drink plenty of water the night before and the day of your treatment.**
